

We're *going Evergreen* on Monday, October 13!

Evergreen Indiana is an open-source integrated library system (ILS). It will help customers find materials and help libraries manage, catalog, and circulate those materials.

What does Evergreen Indiana (EI) mean to me?

- ✓ **You will get a new library card.**
Guilford Township residents will receive a new EI library card without charge.
- ✓ **Fines will be simplified and uniform.**
Overdue fines will be 25¢ per day on all items at all EI libraries. For our customers, this will be an increase for some items (such as books) and a decrease for others (DVDs).
- ✓ **The system is intuitive and easy to use.**
Evergreen ILS was developed by the Georgia Public Library Service and has proven easy for customers to use. It will be easier than ever to use the catalog to find materials you need.
- ✓ **You'll have more options to borrow materials.**
In addition to current reciprocal agreements, you'll be able to borrow most materials from other EI libraries. Nearby libraries which are among the first EI participants are public libraries in Mooresville and Zionsville. More libraries will join soon!
- ✓ **You'll have useful and fun tools to use.**
With EI, create a list of books you've read or want to read. If you wish, you may share the list with friends via the library's catalog.
- ✓ **Your library is a leader. Collaboration equals cost effectiveness.**
The Plainfield Library is one of the first 19 libraries in Indiana to convert to EI. Costs for our EI installation and system maintenance are funded by the Indiana State Library through the Federal Library Services and Technology Act (LSTA).
